

Time to clean up your TOENAIL FUNGUS

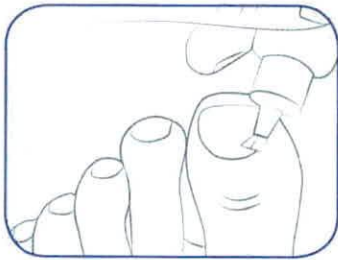

★ WITH JUBLIA® ★

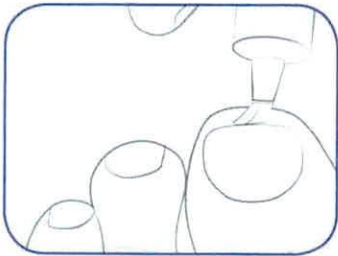

A guide for treatment

- Use JUBLIA exactly as your health care provider tells you
- Apply JUBLIA to your affected toenail(s) 1 time each day for 48 weeks
- Wait for at least 10 minutes after showering, bathing, or washing before applying JUBLIA (your toenails should be clean and dry before applying JUBLIA)
- Wash your hands after applying JUBLIA

JUBLIA®
(efinaconazole)
Topical Solution 10%

- Hold the bottle upside down directly over the affected toenail and allow the product to moisten the brush. Apply one drop of JUBLIA onto the affected toenail
- Do not squeeze the bottle or press/rub the brush firmly against the toenail during application
- Pressing or rubbing firmly against the toenail while applying JUBLIA could cause damage to the brush or overapplication of the drug

- Use the integrated, flow-through brush applicator gently to apply JUBLIA to
 - Entire toenail
 - Cuticle
 - Folds of the skin next to the sides of the toenail
 - Underneath the toenail
- For the big toenail, also apply a second drop to the end of the toenail by touching it with the tip of the moist brush

*JUBLIA allows some patients to have clearer toenails grow back. Individual results may vary.

INDICATION

JUBLIA (efinaconazole) Topical Solution, 10% is a prescription medicine used to treat fungal infections of the toenails.

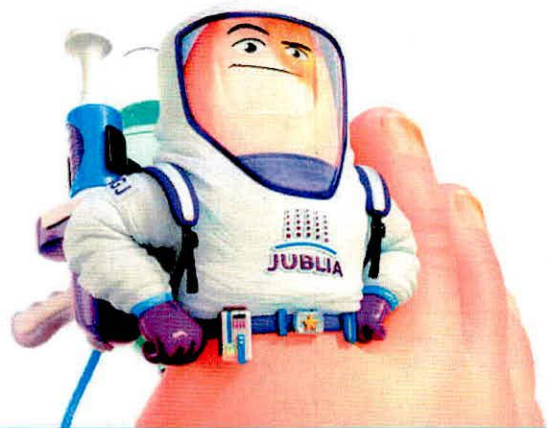

Please see Important Safety Information on reverse and accompanying full Prescribing Information for JUBLIA, including Patient Information and Instructions for Use.

Sticking with treatment

JUBLIA should be applied once daily for 48 weeks, exactly as directed by your doctor. It may be useful for you to establish a routine or daily-dosing regimen to help you stick to your treatment.

Additionally, the time it takes for a healthy nail to grow back varies from person to person. Even after the fungus has been eliminated, **nail regrowth can sometimes take a year or longer.** This is why full results with JUBLIA may not be seen until 52 weeks have passed.

What is toenail fungus?

Onychomycosis (on-ick-oh-my-CO-sis) is a condition that may involve the toenails or fingernails. It may affect as many as 35 million people in the US—but toenail infections are particularly common. JUBLIA is indicated for onychomycosis of the toenail only. Toenail fungus is more than a cosmetic concern.

Symptoms of toenail fungus may include

- Thickening of the nail
- Change in nail shape
- Brittleness
- Discoloration
- Loosening/lifting of the nail
- Crumbling of the nail edges

How JUBLIA works

JUBLIA is specifically formulated to reach the site of onychomycosis to treat toenail fungus. Follow the steps on the reverse (and the accompanying Instructions for Use) to apply JUBLIA with its flow-through brush applicator.

IMPORTANT SAFETY INFORMATION

- JUBLIA is for use on nails and surrounding skin only. Do not use JUBLIA in your mouth, eyes, or vagina. Use it exactly as instructed by your doctor.
- It is not known whether JUBLIA is effective in children.
- Before you use JUBLIA, tell your doctor about all your medical conditions, including if you are or plan to become pregnant, are breastfeeding, or plan to breastfeed, because it is not known whether JUBLIA can harm an unborn fetus or nursing infant.
- Tell your doctor about all medications you are taking, and whether you have any other nail infections.
- JUBLIA is flammable. Avoid heat and flame while applying JUBLIA to your toenail.
- JUBLIA may cause irritation at the treated site. The most common side effects include: ingrown toenail, redness, itching, swelling, burning or stinging, blisters, and pain. Tell your doctor about any side effects that bother you or do not go away.

You are encouraged to report negative side effects of prescription drugs to the FDA. Visit www.fda.gov/medwatch or call 1-800-FDA-1088.
